

Widebody Consolidated Working Conditions 2025

Agreement between the Irish Air Line Pilots Association (herein IALPA) and Aer Lingus Designated Activity Company its subsidiaries, successors and assigns including but not limited to Aer Lingus Limited and Aer Lingus Ireland Limited (herein Aer Lingus or the company) on the working conditions for widebody aircraft operated for or on behalf of Aer Lingus.

This agreement requires IALPA Executive approval and shall only be valid once it has been passed by way of secret ballot of the Aer Lingus IALPA membership by 50% of the votes cast plus one vote. Aer Lingus shall be notified in writing if and when this occurs. This agreement amends the A330 Intercontinental Working Conditions Covering Continental North America and North South Routes (18/10/2000) and incorporates all relevant subsequent agreements in regard to same. This agreement does not alter or nullify any agreement except if expressly stated. Both parties will have the right to withdraw from this agreement or amend any error or omissions with agreement by both parties for a period of 6 calendar months from the date of ratification of this agreement by secret ballot. Should neither Aer Lingus or IALPA notify the other party of withdrawal from the agreement, the agreement will come into full effect.

3.20.	<i>OPERATIONAL CONTINUITY.....</i>	<i>40</i>

SECTION 1 – DEFINITIONS

- (1) **“Airline”** means Aer Lingus DAC
- (2) **“Association”** means The Irish Airline Pilots’ Association.
- (3) **“Annual Leave”** means a period of leave of five or more consecutive days.
- (4) **“Augmented Crew”** means a crew with an extra pilot rated on type carried for the purpose of in-flight relief with the provision of agreed inflight rest facilities.
- (5) **“Continental Duty”** means a flight duty which crosses not more than three standard time zones, or in the case of a single sector, where the block time is less than six hours.
- (6) **“Days off (Free Days)”** means the period during which the pilot is relieved of all duties associated with the Airline and which is indicated by the symbol “F” on the roster.
 - a. **“One Day Off”** means not less than forty consecutive hours.
 - b. **“Due Days off”** means a day off which does not count towards the normal mandatory requirement, and which is indicated by “FDue” on the roster.
- (7) **“Duty”** means any task that a crew member performs for the operator, including flight duty, administrative work, giving or receiving training and checking, positioning and standby.
- (8) **“Duty Time”** means any time the pilot is at the disposal of the Airline, counted in the day in which it is rostered to commence.
- (9) **“ETOPS”** means Extended Range Twin Engine Operations Performance Standards.
- (10) **“Ferry Flight”** means the non-commercial movement of an aircraft from one airport to another.
- (11) **“Flight Duty Period”** means the total time from which a pilot is required to report for a flight, or series of flights, positioning or standby duty until the pilot has completed all functions associated with that duty.
- (12) **“Flight Time”** means the elapsed time from when an aircraft first moves or is moved for the purpose of flight until it next comes to rest after landing on its designated parking position. Synonyms “Block” Time or “Chock” time.
- (13) **“Gash Day”** means a period of time which is free of duty and which is indicated by the symbol “G” on the roster.

- (14) **“Heavy Crew”** means a crew with at least four pilots rated on type, including no less than two Captains qualified on type.
- (15) **“Home Base”** means the station from which a pilot is normally working as agreed with the Airline.
- (16) **“Intercontinental”** means a flight duty with a block time greater than 6 hours for a single sector or which crosses more than three standard (GMT) time zones or North/South (and vice versa) flight duties crossing the 30th parallel North latitude and/or 25 degrees of latitude will be treated as intercontinental for the purpose of calculating flight duty time.
- (17) **“Leave”** means a period of four or less days.
- (18) **“Local Night”** means a local night rest which shall be 8 or more consecutive uninterrupted hours free of duty during the period 22:00 to 08:00 local time
- (19) **“Outstation”** means a station other than home base.
- (20) **“Periods of Time”:**
- a. Time means Local time at base.
 - b. Day means the 24-hour period 00:00 to 23:59.
 - c. Week means the seven-day period 00:00 Monday to 23:59 the following Sunday.
 - d. Month means the Calendar Month – January, February, March etc.
 - e. Year means the Calendar Year, commencing 00:00 January 1st and ending December 31st 23:59.
- (21) **“Positioning by air”** means moving as a passenger by air which may be associated with a flight duty.
- (22) **“Positioning by surface transport”** means moving as a passenger by any agreed form of surface transport. This may be associated with a flight duty.
- (23) **“Posting”** means an absence from home base or from Aer Lingus arranged by the Airline during which a pilot works for the Airline or for any other company or person(s) for a period exceeding 28 days (27 nights). The normal maximum is 26 weeks but may be extended by 4 weeks by arrangement between IALPA and the Airline.
- (24) **“Relief Pilot(s)”** mean a type rated pilot(s) on type carried for the purpose of providing in flight relief during Augmented Crew Operations or Extended Duties as in 2.9.

- (25) **“Rest Period”** means the period during which a pilot is relieved of all duty associated with the Airline. This includes travel time to and from the airport and this period is intended for full physical and mental recuperation following or preceding a duty.
- (26) **“Roster Period”** means a period of four consecutive weeks. There are thirteen roster periods in a planning year numbered RP01 to RP13
- (27) **“Sector”** means a flight between two stations.
- (28) **“Standard Time Difference”** means the arithmetical difference between different time zones. When the international Date Line is crossed, each 15 degrees of longitude between the point of departure and the point of arrival shall be counted as one hour.
- (29) **“Standby”** means a pre-notified and defined period of time during which a pilot is required by the airline to be available to receive an assignment for a flight, positioning or other duty without an intervening rest period.
- (30) **“Stick Time (aka Seat Time)”** means the time spent by a pilot in an operating capacity, at their flight crew station. Total stick time is the summation of all periods a pilot is required to be at their station in one flight duty period.
- (31) **“Time Zone Adapted (Acclimatised)”** means a crew member is adapted to the time of the zone in which they have spent at least Eight times the difference of time between this zone and that of the previous zone in which they were adapted, provided such difference is four hours or more.
- (32) **“Through-The-Night”** means any flight duty encompassing 0300 hours.
- (33) **“Tour of Duty”** means an absence from home base or from Aer Lingus, arranged by the Airline, during which a pilot works for the Airline or for any other company or person(s) for a period exceeding seven days (six nights), but up to a maximum of Twenty-Eight days (twenty-seven nights). It commences with the reporting time of duty at base and ends with the completion of the duty at base.
- (34) **“Trip”** means a succession of duties and rests involving at least one intercontinental duty occurring between first departure from and last arrival at base.
- (35) **“WOCL”** means the period between 02:00 and 05:59. Within a band of three time zones the WOCL refers to home base time. Beyond these three time zones the WOCL refers to home base time for the first forty-eight hours after departure from home base time zone and to local time thereafter.
- (36) **“Wide Body Aircraft”** means a Wide-body aircraft an aircraft greater than 4.2 metres in width.

SECTION 2 - PLANNING LIMITATIONS

2.1. Applicability

- 2.1.1. The applicability of this section “planning limitations” shall govern the preparation of the rosters, which shall accurately reflect the duty to be operated, rest periods and days off.

2.2. Consecutive duties and maximum number of duties

- 2.2.1. The maximum number of consecutive duty days is 6.
- 2.2.2. The maximum number of Duty Days is 208 including training days over roster period 1 to 13 (RP01- RP13).
- 2.2.3. The maximum number of Transatlantic Duties is 58 over roster periods 1 to 13 (RP01-RP13).

2.3. Continental Duties

- 2.3.1. Continental Duties shall be rostered in accordance with the narrow body working conditions (320/321 (neo) working conditions) including continental training duties.

2.4. Customs Clearance/ Post Flight.

- 2.4.1. Thirty minutes shall be included in all intercontinental flight duty time calculations.
- 2.4.2. Twenty minutes shall be included in all continental flight duty time calculations.
- 2.4.3. In the case of positioning by rail, 30 mins shall be included.

2.5. Days Off and Free Time

- 2.5.1. When two or more consecutive days are rostered, the following minimum hours off shall be rostered:

Number of Days	Minimum Planned Hours
One day off	40 hours
Two days off*	61 hours
Three days off	85 hours
Four days off	109 hours

*Where two or more consecutive days off are rostered then the minimum duration that can be planned shall be 37 hours for the first day off and 24 hours for each of the subsequent days off. For example, day five shall be 133 ours and so on.

- 2.5.2. There shall be no single free days.
- 2.5.3. There shall be a minimum of two free days planned at base following an intercontinental duty prior to the next duty.
- 2.5.4. There shall be a minimum of three free days planned at base following an augmented intercontinental duty prior to the next duty.
- 2.5.5. Should the pilot have 46 hours between arrival and departure at an outstation following the commencement of the planned rest period (46 hours must include a free day (F) denoted on the roster) the coefficient generated by the trip may be reduced one. This coefficient reduction can be planned up to a maximum of once per roster period and 10 times per year (RP01 to RP13) and once in any trip. This does not change the minimum days off per roster period.

- 2.5.6. The minimum days off per roster period shall be 9. There is no reduction in days off due to leave (4 consecutive days or less).
- 2.5.7. The minimum days off per roster period shall be 8 when 5 or more annual leave days (5 consecutive days or more) are rostered.
- 2.5.8. No free days are generated by leave or the first five days training.
- 2.5.9. When two or more consecutive days off are planned then the duty prior to the free days shall finish not later than 23:00 and the next duty day shall not commence prior to 07:00. However, the earliest commencement time for a continental duty following free days shall be 06:00.
- 2.5.10. When there is a single daily service to an augmented destination the pilot shall be planned with no less than four days off immediately following the duty and one day credited into the pilots' coefficient bank.
- 2.5.11. Should the west coast destination be rostered with two-nights (night stop is defined by a local night between 22:00 and 08:00 local time) the pilot shall receive three days off immediately following the duty with one day credited into their coefficient bank.
- 2.5.12. Should the service be scheduled at five or less per week then the pilot shall receive three days off immediately following a single night stop duty and two days shall be credited in their coefficient bank.
- 2.5.13. Westcoast U.S. / Canada to Shannon shall be rostered with the crew positioning Dublin within an overall duty limit of 14.5 hours followed by 4 days off. If positioning to Dublin cannot be achieved within 14.5 hours, then crew can overnight Shannon followed by positioning to Dublin the next day followed by 3 days off. In this situation the crew will be compensated by the payment of an agreed OWC payment and credited with a due day. If this cannot be granted within the next roster period, it will be credited to the pilots' leave balance.

2.5.14. Days off depending on scheduled augmented service:

Scheduled Service	Augmented	Single night		Two or more local nights	
		Days Off	Co-eff Bank	Days Off	Co-eff Bank
7 days per week		4	1	3	1
6 days per week		4	1	3	1
5 or less days per week		3	2	3	1
If called off standby		3	2	3	1

2.5.15. Coefficients and agreed Coefficients duties.

2.5.15.1. Each flight duty generates a coefficient value which equates to free days. One coefficient equates to one free day. Free days will be planned post duty and or into the pilots “free day bank” depending on the type of duty and the coefficient value in accordance with the planning and operational rules. For example, a core duty generates a coefficient of 2.6, which equates to a minimum of two free days planned after the duty and a credit of 0.6 free days in the bank or should three days be planned to follow the core duty a value of -0.4 is applied to the “free day bank”.

2.5.15.2. Coefficient Values Intercontinental Duties:

Duty	Co-efficient
Core Duty	2.6
MCO	3.5
US West Coast	4.0
SP US West Coast*	5.0
Minneapolis	3.3

Core duties: NYC, BOS, ORD, IAD, BWI, YYZ

2.5.15.3. The co-efficient below apply to continental day duties only, there are no co-efficient agreed for overnights or through the night flights.

Duty			Co-efficient
Malaga (F)			1.30
Faro (F)			1.30
Gran Canaria (A)			2.25
Duty	Hours		Co-efficient
	>	=	
A	8.5	9	2.25
B	8	8.50	2.10
C	7.5	8	1.90
D	7	7.5	1.70
E	6.5	7	1.50
F	6	6.5	1.30
G	5.5	6	1.10
H	5	5.5	0.90
I	4.5	5	0.70
L	0	4.5	0.60

2.5.15.4. Coefficient balances will be reset to zero at the end of the 13th (final) roster period each year.

2.5.15.5. A negative balance will be written off by the company at the end of the 13th (final) roster period each year. A maximum positive balance of two coefficient days may only exist by the end of the 13th (final) RP. Should these two days exist they shall be credited to the pilot's annual leave balance for that leave year. The pilot will be notified if this occurs.

2.5.15.6. Starting with RP1 the thirteen roster periods are divided into 4 Sections:

Section	Roster Period (RP)
1 (3 periods)	RP1 -RP3
2 (3 periods)	RP4 – RP6
3 (4 periods)	RP7 - RP10
4 (3 periods)	RP11 – RP13

2.5.15.7. Days are not required to balance to zero at the end of sections 1, 2 or 3. A positive balance of 8 days (owed to the pilot) or negative balance of 8 days (owed to the company) may be carried over from section 1 into 2 or 2 into 3 or 3 into 4. This balance is the difference between the numbers of days generated by duties operated in a section versus the number of free days rostered in that section.

2.5.15.8. Only section 3 can be balanced by the company provided all the following conditions have been met: The maximum carry over is 8.

2.5.15.8.1. 21 core trips have been completed in Section 3

2.5.15.8.2. No productivity availed of in the section under the away day rule.

2.5.15.9. Should all the conditions of 2.5.15.8 be met the company can use the last three days of section 3 to complete or initiate an Intercontinental Duty or the company can roster 2 Malaga's (or an equivalent duty), one at their discretion and one on the last day of the section or in a situation where the company cannot take advantage of either of the first two options, they can use the last two days for any non-coefficient generating duties.

2.5.15.10. Coefficient calculation methodology

$850 / (\text{scheduled total trip block time}^*) = x$

X is total trips achievable to that destination

$365 - 35^{**} - 7^{***} \text{ training days} = y$

$X * 3 = z$

Z is the days available for rostering

$y - z = v$

v is the free days per year

$v/x = \text{coefficient days for the trip}$

$y - z = v \text{ free days per year}$

*block times taken from Aer Lingus public schedule.

** Annual leave may change with agreement - currently 35 days

*** Training days may change with agreement and or increase due to EASA compliance – currently 7 days

2.5.16. Two-day turnarounds (two days off)

- 2.5.16.1. There will be a planning limit of five consecutive two-day turnarounds. After the sixth trip a minimum of three days off must be rostered (Leave will reset the sequence).
- 2.5.16.2. Where a flight duty (or recurrent sim) is rostered immediately before a transatlantic flight duty then this will be considered as part of the transatlantic duty and will not result in resetting the consecutive sequence.
- 2.5.16.3. Where there are unusually high sickness levels causing rostering difficulties, the planning department will notify and demonstrate and agree this with IALPA in the widebody TWG (technical working group). The TWG can agree a temporary increase in two day turnarounds to six to be reviewed on a monthly basis.
- 2.5.16.4. The operational limit will also be five consecutive two-day turnarounds except in the case where the sixth flight is delayed to the extent that it encroaches into the three days off then two days off is permitted and the pilots are credited with a OWC day off payment or a leave day.

2.5.17. Augmented Crew Operations

- 2.5.17.1. Prior to any intercontinental augmented/ heavy crew operation, the crew may be rostered no less than two days off or two days off followed by a positioning flight or two days off followed by a flight duty as defined in 2.7.
- 2.5.17.2. The minimum number of days off at base following an augmented or heavy crew flight shall be three or four depending on scheduled service as per 2.5.14. This will also apply to pilots who may be used on reserve for such a duty.
- 2.5.17.3. Any aircraft introduced into the widebody fleet for the purpose of augmented crew operations will be fitted with the aircraft manufacturers pilot rest area in the forward cabin.

2.5.17.4. On return to base immediately following a non-transatlantic duty of at least 68 hours a pilot shall be rostered free days as follows which shall count towards the roster period entitlement:

Number of Night Away from Base	Number of Days Off
3	3 days off
4	3 days off
5	3 days off
6	4 days off
7	4 days off

Etc to a maximum of Fourteen days off.

- 2.5.18. Where a trip of at least sixty-eight hours applies to training duties for line pilots the days off shall be the same up to and including 8 nights away from base. For overnights from nine to twenty nights away the overall entitlement remains the same but only four days need to be rostered off on return to base and the remainder due must be given, consecutively, within two roster periods or credited to annual leave. For overnights more than twenty nights in duration five days off must be rostered immediately on return to base and the remainder, up to a combined maximum of fourteen will be given as detailed above.
- 2.5.19. Where a series of overnights do not terminate in the roster period in which they commenced, the total days off in the two roster periods shall be not less than eighteen.

2.6. Positioning

2.6.1. Positioning by air shall count as full Flight Duty Time.

- 2.6.1.1. All pilots shall travel Business Class or better on a space available basis. Their seats shall be booked at the planning stage and not later than the day of publication of the advance roster. If at the time of booking, there is no space available in Business Class, then seats will be booked in Economy Class with a priority upgrade to Business Class or best available. This clause may be renegotiated if (1) Aer Lingus reintroduce First Class, or (2) Superior Duty travel arrangements are agreed to other groups of staff.
- 2.6.1.2. If passenger seats are not available, positioning crew may be treated as supernumerary crew, with full duty credits.
- 2.6.1.3. Pilots who are traveling for the purpose of simulator training in Europe shall be booked economy with upgrade to best available seat/class if available on the day.

2.6.2. Positioning by surface shall count as full duty time

2.6.2.1. Pilots shall travel first class where available, or next best if first class is not available.

2.6.2.2. Where positioning by road is by taxi or limousine, and the journey time is anticipated to be greater than one hour, then the standard of transportation must be a limousine or executive standard.

2.7. Duty on the day before an intercontinental Flight

2.7.1. Shall not commence before 0600 for a flight to Malaga, Faro or similar duty. All other duties should not commence before 07:00.

2.7.2. Shall finish before 2100.

2.7.3. Shall not exceed nine hours duty.

2.7.4. Shall be followed by a rest period of not less than fifteen hours.

2.7.5. These limitations do not apply to reserve duties, which must be followed by a minimum rest period of thirteen hours.

2.8. Flight duty limitations shall for training and executive pilots

2.8.1. Flight duty limitations shall apply to all executive and training pilots who are members of IALPA.

2.9. Extended Duties (with relief pilot)

2.9.1. Five (5) times per year the normal flight duty as laid down in 2.15.1 and 2.15.2 may be extended by one (1) hour by the provision of a Relief Pilot. A minimum of one passenger seat in the forward cabin will be provided to accommodate the resting pilot.

2.9.2. A maximum of three (3) landings shall apply to extended duties.

- 2.9.3. Should such a duty be combined with extended positioning, then the duty as operating crewmember shall be not more than twelve (12) hours from commencement of duty, with a duty limit of sixteen (16) hours. The duty limit is reduced to fourteen (14) hours if the duty as operating crewmember enters the period 00:00 hrs to 01:59 hrs, or twelve (12) hours if the duty as operating crewmember enters the period 02:00 hrs to 06:00 hrs. The duty limit for an Eastbound Transatlantic duty is twelve (12) hours. All times refer to local time at base.
- 2.9.4. Not less than Fourteen (14) days shall separate consecutive extended duties.
- 2.9.5. Extended duties will be indicated on the roster by the letters “EXD” and a running annual total of such duties shall be shown on the roster

2.10. Extended Duties Continental

- 2.10.1. On eight occasions per year, the normal flight duty limitation, as laid down in section 2.10.4 of the narrow body working conditions A320/321 (neo) working conditions may be extended by up to one hour.
- 2.10.2. Maximum number of night extended duties shall be two per year. This duty shall not include two departures from Base.
- 2.10.3. When an extended flight duty enters the period 0200 to 0600, four landings shall not be exceeded. This limitation does not include landings as a passenger.
- 2.10.4. Immediately preceding an extended flight duty, other than extended positioning, a duty not exceeding eight hours and finishing before 2330 hours may be rostered. Immediately following an extended duty two days off must be rostered.
- 2.10.5. Crew Planning shall ensure that these duties are equally distributed.
- 2.10.6. Not less than seven days shall separate consecutive extended day flight duties.
- 2.10.7. Not less than fourteen days shall separate consecutive extended flight duties either of which is a night duty.

2.11. Extended Positioning

- 2.11.1. When positioning or positioning combined with duty as operating crew, the normal flight duty may be extended to Sixteen hours. This is reduced to fourteen hours if the duty as operating crewmember enters the period 00:00 hrs to 01:59 hrs or to twelve hours if the duty as operating crewmember enters the period 02:00 hrs to 06:00 hrs.
- 2.11.2. The limit for an Eastbound Transatlantic duty is twelve hours. All times refer to local time at base.
- 2.11.3. Duty as operating crewmember shall not be rostered after Eleven hours from commencement of duty except as in 2.9 above.
- 2.11.4. Extended positioning duties are limited to one per Roster Period.
- 2.11.5. Extended positioning duties will be indicated on the roster by the letters "EDH" and a running annual total of such duties shall be shown on the roster.

2.12. Flight Preparation

- 2.12.1. Seventy-Five minutes flight preparation time shall be included in all intercontinental flight duties departing from the island of Ireland.
- 2.12.2. Sixty minutes flight preparation time shall be included in all other flight duties.

2.13. Landing Intercontinental as Operating Crew

- 2.13.1. Four landings shall not be exceeded.
- 2.13.2. Two landings shall not be exceeded following an eastbound transatlantic flight.
- 2.13.3. Two landings shall not be exceeded for an augmented crew
- 2.13.4. One landing shall not be exceeded for a heavy crew.

- 2.13.5. Any augmented crew operation between DUB-LAX-DUB or SNN-LAX-SNN shall be limited to one planned landing. On any other augmented crew long-haul route (i.e where there is one sector of at least nine hours duration) one additional landing may be planned, but only westbound and only within Ireland.
- 2.13.6. The above (2.13.1 to 2.13.5) do not apply to any portion of a flight duty which involves positioning.

2.14. Landing Continental

- 2.14.1. Seven landings shall be allowed when three consecutive sectors are less than one hour each.
- 2.14.2. Six landings shall not be allowed except as in (2.14.1) above.
- 2.14.3. Four landings shall not be allowed when an extended duty enters 01:00 to 06:29, or during any through the night flight duty or for an aggregate of two successive through the night flight duties.

2.15. Length of Duty Day (maximum flight duty period Intercontinental)

- 2.15.1. The normal flight duty period shall not exceed twelve hours for a two-pilot operation.
- 2.15.2. Eastbound Transatlantic and through the night North/South flight duty periods shall not exceed Eleven hours for a two-pilot operation.
- 2.15.3. The normal flight duty period for an augmented crew shall not exceed fifteen hours for duties outside the WOCL. When the duty starts in the WOCL the 15 hours will be reduced by 100% of its encroachment into the WOCL up to a maximum of two hours. When the duty ends in or fully encompasses the WOCL the fifteen hours will be reduced by 50% of its encroachment. This will be reduced by the duty time within the WOCL up to a maximum of two hours. South Africa is an exception to this limit.
- 2.15.4. Where an aircraft is not fitted with an agreed cockpit crew rest area then the flight duty period for an augmented crew operation shall not exceed 14 hours westbound and 13 hours eastbound.

2.15.5. The duty time limit for a heavy crew shall be 17 hours.

2.16. Meal Breaks

2.16.1. Where a meal break on the ground is required then the minimum time shall be sixty (60) minutes chock to chock.

2.17. Medicals (state and company) and Vaccinations

2.17.1. No duty shall be rostered to finish after 2100 hours on the day before a medical.

2.17.2. After an intercontinental flight duty, a rest period of not less than forty hours shall precede a medical.

2.17.3. The company will ensure that all pilots operating to serviced destination will be provided with the required inoculations as determined. No inoculation/vaccination may be rostered immediately before or after a flight duty.

2.18. Posting

2.18.1. A ground school training course away from base shall not be deemed a posting.

2.19. Days Off Peremptory

2.19.1. In each planning year (RP01 to RP13) each pilot may request up to three peremptory requests (PR) which must be granted to at least one pilot per seat per day, on a rotational basis if necessary. If more than one pilot in a seat requests the same day, the day shall be awarded based on seniority. Pilots shall request the PR at least 35 days prior to the roster publication. PR requests are in addition to the pilot's annual leave entitlement. Pilots shall submit their PR requests via the specified channel which may be updated from time to time.

2.19.2. The Airline may specify two roster periods each year when the peremptory request may not necessarily be granted. These periods shall be posted not later than 31st May each year.

2.20. Annual Leave

2.20.1. In each annual leave year, a pilot shall be entitled to thirty-five annual leave days of 6 blocks, Monday to Friday (thirty-four days for the pilot and one day for IALPA).

2.20.2. The two-week block shall be as follows FFLLLLLFFLLLLLFF.

2.20.3. A pilot is entitled to a weekend free before both two weeks leave blocks.

2.20.4. One week's leave shall be as follows FLLLLLFF.

2.20.5. A pilot may bid for and is entitled to eight days free of duty on the one-week block of leave and this should be bid for in order of preference thirty-five days prior to roster publication with the following options (w= workday):

Option	Thur	Fri	Sat	Sun	Mon	Tue	Wed	Thur	Fri	Sat	Sun	Mon
A	W	F	F	F	L	L	L	L	L	W	W	W
B	W	W	F	F	L	L	L	L	L	F	W	W
C	W	W	W	F	L	L	L	L	L	F	F	W
D	W	W	W	W	L	L	L	L	L	F	F	F

The default no bid is as follows: FLLLLLFF

- 2.20.6. Should a pilot be assigned annual leave the pilot shall be contacted by the company at least 30 days in advance to establish which preference is requested as per the table 2.20.5.

2.21. Standby Duties

- 2.21.1. There will be two types of standby on the planned roster STBH (Standby home) and STBB (Standby Block)
- 2.21.2. A single standby duty (STBH) may be rostered before any flight duty with a limit of one STBH per pilot per roster period. STBH will be rostered within time bands.
- 2.21.3. STBH will cover any duty reporting within the planned time band providing it does not encroach days off.
- 2.21.4. Normal Coefficient values will apply to duties assigned whilst on STBH.
- 2.21.5. STBB will be five or six days in duration.
- 2.21.6. At least Two Free Days must follow a STBB.
- 2.21.7. Notification for STBB will be roster publication.
- 2.21.8. Free days associated with a T/A duty shall be guaranteed when a TA duty is operated.
- 2.21.9. A pilot will be rostered for a maximum of six blocks of STBB in roster periods one to thirteen.
- 2.21.10. STBB will be rostered within time bands.
- 2.21.11. A pilot will report within two hours of being called off standby.
- 2.21.12. STBB will cover any duty reporting within the planned time band providing it does not encroach days off
- 2.21.13. STBB shall not exceed Ten (10) hours per standby duty.
- 2.21.14. A pilot on standby may contact crew control and request release from the standby.
- 2.21.15. A pilot on standby assigned a duty will report as soon as possible but no later than 2 hours from the time of contact.

2.21.16. A standby duty, or series of standbys, rostered before a day off or leave, shall cover only flights whose duty times are scheduled to terminate at Base before 2200 on the day before the day(s) off or leave.

2.21.17. Standby ceases when the pilot reports at the designated reporting point.

2.22. Rest Periods

2.22.1. The minimum turnaround at an outstation between the completion of an intercontinental duty and the commencement of another intercontinental duty, shall not be less than twenty-two (22) hours, free of all duty, except as detailed in 2.22.3 and 2.22.4.

2.22.2. A rest period of not less than fifteen hours shall precede any intercontinental flight duty. This may be reduced to thirteen hours when preceded by a standby duty.

2.22.3. Positioning from one outstation to another outstation or base, may be rostered after a minimum of fourteen hours rest. The balance of rest due under this heading must be added to the rest period immediately following the positioning duty.

2.22.4. During a turnaround, if positioning occurs from one outstation to another, one turnaround must be of at least eighteen hours duration.

2.22.5. The minimum rest period at an outstation following an eastbound flight shall be the rostered duration of the flight duty plus the standard time difference, and not less than Fifteen hours, followed by positioning to base for days off.

2.22.6. Rest periods for augmented and or heavy crew operations at base are as per Article 2.7.

2.22.7. Minimum rest at base following a continental duty shall be the rostered duration of the duty plus 2 hours and not less than 12 hours. At an outstation this shall be reduced to the rostered duration plus 2 and not less than 11 hours.

2.22.8. Following a through-the-night continental duty the minimum rest shall be the rostered duration of the duty plus four hours and not less than fourteen hours.

2.23. North/South Duties

- 2.23.1. The minimum rest period at base before the flight duty shall be the preceding duty plus four hours and not less than fourteen hours.
- 2.23.2. The minimum rest period at an outstation following the flight duty shall be duty plus four hours and not less than fourteen hours.
- 2.23.3. The minimum rest period at base following such a duty shall be duty plus four hours and not less than fifteen hours and will include at least one rest period covering 21:00 to 07:00 hours local.

2.24. South Africa

- 2.24.1. There will be an outstation rest of two local nights or forty hours free of all duty whichever is greater
- 2.24.2. At all times pre and post duty, days off will be no less than two pre and three post except following a multi sector eastbound transatlantic flight in which case a minimum of three days off pre duty will be rostered.
- 2.24.3. No duty to or from South Africa will consist of more than one sector.

2.25. Rosters

- 2.25.1. The published roster shall become binding when it is published, however the company can make amendments to the published roster before or on any Friday prior to 18:00 for the proceeding Monday, this is called a “Friday Change”.
- 2.25.2. Prior to a Friday change all duties can be amended, including being changed onto STBH. The only item that cannot be changed by a Friday change is a day off (free day).

- 2.25.3. Friday changes may be notified by either AIMS or by telephone. Friday change notifications entered by 18:00 hours on the Friday will not require a telephone confirmation from crew control and pilots will access changes from AIMS. Where a pilot has not been contacted or has not accessed the Friday changes from AIMS the Friday changes will be communicated as part of the normal AIMS notification process.
- 2.25.4. Rostered days off shall not be changed on the published roster in any event.

2.26. Simulator and or Flying Training

- 2.26.1. Flight duty limitations shall apply to all duties associated with simulator training.
- 2.26.2. Simulator and or flying training away from base shall not be deemed a tour of duty.
- 2.26.3. Line checks, periodic checks and instrument rating checks, shall not be rostered immediately following overnights away from base. This does not apply to routine recurrent training or to training/checks away from base.
- 2.26.4. Periodic and instrument rating checks shall be preceded by a night rest period (0001-0700).

2.27. Stick Time (Seat Time)

- 2.27.1. Stick time on a single sector transatlantic flight shall not exceed nine hours westbound and eight hours eastbound.
- 2.27.2. Total Stick time on a multi sector westbound transatlantic or any North/South day flight shall not exceed nine hours and thirty minutes.
- 2.27.3. Total Stick time on a multi sector eastbound transatlantic or any through the night North/South flight shall not exceed eight hours and thirty minutes.

2.27.4. Total stick time on a single or multi sector flight to or from Florida only shall not exceed nine hours and forty-five minutes outside of the WOCL and eight hours forty-five minutes if the flight enters the WOCL.

2.28. Turnarounds at Dublin Airport

2.28.1. Not less than forty-five minutes shall separate flights at Dublin Airport.

2.29. Sequencing of Flights

2.29.1. For an augmented or heavy crew operation there will be a minimum gap of seven days between the completion of an eastbound flight to base and a subsequent eastbound flight or, a westbound flight to a base followed by a subsequent westbound flight.

SECTION 3 - OPERATING LIMITATIONS

3.1. Applicability

- 3.1.1. The applicability of this section “operating Limitations” shall govern the application and operation of the rosters.

3.2. Change of Duty by the Airline

- 3.2.1. Minimum rest periods shall be observed:
- 3.2.2. In all case the return to base must be the same day as originally rostered. Where a pilot has requested the flight, they shall only be changed as a last resort.
- 3.2.3. At Base, a pilot rostered for a series of flights may be transferred to another series of flights of similar or lesser duration, provided the pilot is notified before 2200 hours on the previous day. At least Fourteen hours’ notice shall be given prior to commencement of the duty provided that all other provisions in 3.1 are adhered to.
- 3.2.4. At Base, on the day of operation, a pilot can have their roster flight duties changed to different flight duties provided that the check in time is not more than one hour earlier or four hours later. If the change is to an augmented crew operation, then it cannot be more than one hour earlier or two hours later.
- 3.2.5. At Base, when at least Fourteen (14) hours’ notice is given, a pilot rostered for a flight duty may be transferred to another duty of similar duration whose reporting time is within plus or minus two (2) hours of the original. Such notice shall be given not later than 2200 hours on the previous day. If the pilot consents the reporting time may be brought forward by more than Two (2) hours.
- 3.2.6. At Base, when a pilot has reported for a flight duty, the change cannot be more than two hours later.
- 3.2.7. At base a pilot may be changed onto standby from their original duty should their original duty be required for training, checking, pilot recency, aircraft type change or a flight schedule change or cancellation

and the pilot will then only be called off standby if all other standby pilots have been used, except for the pilot's original duty. Normal change of duty rules applies as per this section.

- 3.2.7.1. The maximum change to standby is plus or minus one hour with at least twelve hours' notice, with less than twenty-four hours' notice the change is plus or minus two hours. These standbys cannot be used to cover a flight starting on the day the pilot was originally scheduled to return to base that finishes beyond one hour of their original off duty time, unless individually agreed.
- 3.2.7.2. Pilots on standby should check their AIMS on the day before checking for changes but equally if there is a short notice change (twenty four hours or less) crew control should make extra effort to contact the pilot and advise of changes. There is responsibility on both sides to maintain the operation.
- 3.2.8. At an outstation, the airline may change a pilot's rostered flight duty when the change arises after the pilot has departed from base.
- 3.2.9. At an Outstation, on the day of operation, for operational reasons a pilot can have their rostered flight duties changed to different duties provided that the check in time is not more than one hour earlier or four hours later. If the pilot has already reported, then the duty can only be changed to a maximum of two hours.
- 3.2.10. At an outstation, changes other than those in 3.1.8 above, require not less than twelve hours prior notice. This may be reduced at the pilot's discretion. This does not apply to a delayed flight, if a delay impinges on a pilot's day (s) off they will be compensated as per 3.4.
- 3.2.11. At an outstation, after reporting for duty, the maximum duty time must not be exceeded.
- 3.2.12. At an outstation, a pilot's contracted day(s) off cannot be changed, except when the pilot agrees. When a pilot's planned flight is delayed and there is no rational possibility of retrieving the situation, then the airline may request and anticipate that the pilot will operate the delayed flight, in a situation where a delay into a day off would seriously inconvenience a pilot then the airline will make every effort to return the pilot to base for their day off. They will be compensated by a Blue Sheet payment for "Working on a day off".

3.3. Recovery of Roster

3.3.1. Failure of a pilot to report for a transatlantic flight duty, when such failure is caused by the pilot, may result in his/her roster being changed as follows. If the pilot is available for duty the following day then they can be rostered to operate another transatlantic flight provided the return to base only affects the first day off. Days off generated by the flight duty will not be reduced below the minimum and work on a rostered day off will be compensated by the rostering of an extra day off within 3 roster periods. If this is not possible an extra leave day will be added to the leave entitlement. A rostered requested day off cannot be changed without agreement.

3.3.2. Continental

- 3.3.2.1. On the day of operation, a pilot's roster duty may be changed by not more than one hour earlier or finishes not more than two hours later than that shown on his published roster. If a pilot accepts a change greater than this (s) he is entitled to a blue sheet payment for an agreed OWC duty.
- 3.3.2.2. When twenty-four hours' notice is given before the rostered or amended duty, a pilot's rostered duty may be changed by up to two hours earlier or later. Such notice shall not be given between 2200 and 0900 hours. If a pilot accepts a change greater than this, they will be entitled to a blue sheet payment for an agreed OWC duty.
- 3.3.2.3. When the roster duty is changed to STBH duty the reserve duty shall fall within plus or minus one (+/-1) hour of the original flight duty.
- 3.3.2.4. When flights are running off schedule, a pilot shall not be transferred to another flight duty or duties, if such a transfer means that the pilot shall finish more than one (1) hour later than the original duty.
- 3.3.2.5. The pilot's new duty shall not exceed the limitations of article 2.11.

- 3.3.2.6. If the pilot consents, a change may be made which puts them off duty more than one (1) hour later than the original duty and the pilot will be entitled to a blue sheet payment for an agreed OWC duty.
- 3.3.2.7. Following an unscheduled overnight, the airline may change the pilot's flight duty to another flight duty. The new flight duty shall not finish more than one hour later than the original flight duty.
- 3.3.2.8. If the pilot consents, the new flight duty may finish more than one hour later than the original flight duty and the pilot will be entitled to a Blue Sheet payment for an agreed OWC duty.
- 3.3.2.9. A standby duty, which begins before 0800, shall not be brought forward unless the pilot is advised twelve hours in advance of the commencement of the new duty, and not after 2100 hours. The limitations of 2.22 must be observed.
- 3.3.2.10. In the absence of such notice the pilot may not be called until the start time of the standby. The maximum changes shall be:
 - 3.3.2.10.1. One hour with a minimum twelve hours' notice
 - 3.3.2.10.2. Two hours with a minimum twenty-four hours' notice

3.4. Days Off Intercontinental

- 3.4.1. When a day off is infringed by a delayed flight returning to base. the following will apply:
 - 3.4.1.1. Should the pilot's flight duty terminate at base at or before 23:00 on the day before a single rostered day off, or 23:00 on the day before two or more consecutive days off, and the day(s) off expressed in hours are less than the minimum expressed in 2.5.1, then the pilot will be entitled to claim either a day's leave or a Blue Sheet payment for "working a day off". The finishing time of the pilot's rostered duty must be delayed by two hours or more to generate this compensation. Should the pilot opt for a day's leave, it will be granted by the end of the following roster period or if this is not possible it will be added to the pilot's annual leave entitlement.

3.4.1.2. Should a pilot's flight duty terminate at base after 23:00 hours before a day off or before two or more consecutive days off, then the pilot can opt for a day's leave as detailed in (3.4.1.1) above or a blue sheet payment for "working on a day off".

3.4.1.3. Where a delay to the pilot's rostered duty results in an unscheduled overnight, and the pilot returns to base on their day off, then the pilot is entitled to their minimum number of days off expressed in hours as in (3.5.1.3.1) below, and a Blue Sheet payment for "working on a day off".

3.4.1.4. The minimum number of hours for day(s) off required under this agreement shall not be less than:

Number of Days Off	Minimum Hours Required
1 day	37 hours
2 days	59 hours
3 days	83 hours
4 days	107 hours and so on

3.4.1.5. When a pilot operates an international flight duty to base, they must have the numbers of days off applicable to that duty.

3.5. Days off Continental Duties

3.5.1. Duty termination time continental

- 3.5.1.1. When a delayed flight duty terminates at base at or before 23:00 hours on the day before a single rostered day off, or at or before 23:59 before 2 or more consecutive days off, and the day(s) off are less than specified in 2.5.1, then compensation as in 3.6.1.2 below will be granted.
- 3.5.1.2. When a delayed flight duty terminates at base after 23:00 hours on the day before a rostered day off, or after 23:59 hours before two or more rostered consecutive days off, then the following will apply:
 - 3.5.1.2.1. Compensation will be granted 3.6.1.2 below or if the pilot is on a duty, which can be relieved at base prior to 2200, they can request to be released. If a reserve is available, then they will be released without compensation.
- 3.5.1.3. Compensation:
 - 3.5.1.3.1. Rostered duty termination delayed by up to one hour receives no compensation.
 - 3.5.1.3.2. Between 61 and 120 minutes, compensation will be at the OWC rate of 0.19% of basic salary.
 - 3.5.1.3.3. Rostered duty termination delayed by more than two hours will be compensated by one day off, or alternatively the pilot may accept a blue sheet payment equivalent to working on a day off.

3.6. Minimum Duration of days off

3.6.1. Continental:

- 3.6.1.1. Pilots who are delayed beyond their rostered duty termination time before day(s) off shall not have such days off (expressed in hours) reduced below the following minima calculated from the completion of the delayed duty:

Number of Days Off	Minimum Hours Required
1 day	37 hours
2 days	59 hours
3 days	83 hours
4 days	109 hours and so on

- 3.6.1.2. If the pilot agrees to accept a reduction below these values, then they will receive compensation either in the form of one day off, or alternatively the pilot may choose to accept a Blue Sheet payment 'For working on a day off'.
- 3.6.1.3. Day(s) off generated in this manner will be granted by the end of the following roster period. If not, they will be added to the pilot's annual leave entitlement.
- 3.6.1.4. When there is a single daily service to an augmented destination with aircraft manufactured rest areas in the forward cabin for pilots the pilot shall receive with no less than four days off immediately following the duty and one day credited into the pilots' coefficient bank. Should the pilot operate the augmented flight due to being called off standby the pilot shall receive three days off immediately following the duty with two days credited in the coefficient bank.

3.7. Delayed Flights Intercontinental

- 3.7.1. When a pilot is advised of a delay before commencing a flight duty and the delay is less than Four hours the maximum flight duty time shall be calculated from the actual reporting time.
- 3.7.2. If the delay is four hours or more, the maximum flight duty time shall be calculated from the rostered reporting time plus four hours.
- 3.7.3. At base, when it is known that a delayed flight duty will infringe on the conditions for subsequent days off, a pilot so affected may choose not to operate such a duty, notwithstanding any compensation offered in 3.4 above) Crew Control shall contact a pilot to advise of any delays or unscheduled overnights.

3.8. Delayed Flights Continental

- 3.8.1. When a pilot is advised of a delay before commencing a flight duty and the delay is less than two hours, the maximum duty time shall be calculated from the actual reporting time.
- 3.8.2. Where a pilot is advised of a delay more than two hours the maximum duty will be calculated from the rostered reporting time plus 2 hours. Flight duty period commences at the actual reporting time.

3.9. Duty in Association with a Flight Duty

- 3.9.1. A duty preceding or following a flight duty shall form part of that total flight duty period.
- 3.9.2. A pilot may exchange their rostered duties with another suitably qualified pilot.

- 3.9.3. Failure of a pilot to operate a flight duty, through no fault of the Airline, renders the subsequent duties liable to alteration at the discretion of the Airline, without compensation, for the duration of the published roster only, and within the Planning Limits of Section 2.
- 3.9.4. A pilot shall be responsible for giving the Airline the maximum notice of their inability to fulfil a rostered duty.

3.10. Maximum Flight Duty Time

- 3.10.1. In the event of delays, the limitations of 2.9.1, 2.11.1, 2.11.13, 2.15.1 and 2.15.2 may be extended by one hour to the maximum of sixteen (16) hours, whichever is the lesser in a two-pilot operation should the duty as operating pilot enter the period 01:00 hrs to 06.29 hrs, then the limit is twelve hours duty as an operating pilot.
- 3.10.2. The maximum flight duty time for Augmented crew may be extended by two hours however the extension may be one hour in the case of operations that encroach by at least that amount into the WOCL.
- 3.10.3. Where an aircraft is not fitted with the agreed cockpit rest area the maximum Flight Duty Time shall be fifteen hours westbound and fourteen hours eastbound.

3.11. Maximum Landings

- 3.11.1. Two landings shall not be exceeded following an Eastbound Intercontinental flight.

3.12. Meal breaks

- 3.12.1. Where a meal break on the ground is required then the minimum time shall be sixty minutes chock to chock.

3.13. Minimum Rest Periods

- 3.13.1. Prior to an intercontinental flight duty, the minimum rest period shall be not less than fifteen hours, except when preceded a standby duty (STBH), when the minimum rest period shall not be less than thirteen hours.
- 3.13.2. Following an intercontinental flight duty, the minimum rest period shall be the actual flight duty plus the standard time difference and shall not be less than eighteen hours, except as in (3.16.4) below. This need not include a local night.
- 3.13.3. When operations are delayed at an outstation, a minimum turnaround of eighteen hours shall be given to a pilot.
- 3.13.4. When operations are delayed, a positioning duty from one outstation to another, or to base, may be initiated after fourteen hours rest. The balance of rest due must be added to the rest period immediately following the positioning flight.
- 3.13.5. Rest at an outstation after an eastbound flight shall be the actual duty plus the standard time difference, and not less than fourteen hours, and shall be followed by positioning to base.
- 3.13.6. During an intercontinental turnaround, if positioning occurs from one outstation to another, one turnaround must be of at least fifteen hours duration.

3.13.7. Continental and or Canary Islands

- 3.13.7.1. The minimum rest period at base shall be the actual flight duty plus two hours and not less than twelve hours.
- 3.13.7.2. The minimum rest period at an outstation shall be the actual duration of the flight duty plus two hours and not less than eleven hours.

- 3.13.7.3. Following a through-the-night flight duty or any flight duty delayed such that it encompasses 0330 hours the minimum rest period shall be the actual duty plus four hours and not less than fourteen hours.

3.14. Outside Working Conditions

- 3.14.1. Compensation will be the following percentages of basic pay:

- 3.14.1.1. Working on a free day 0.57%
- 3.14.1.2. Working on a gash day 0.38%
- 3.14.1.3. Agreed duty outside contract 0.19%
- 3.14.1.4. Less than minimum rest (Less the first 30 mins) 0.19%

3.15. Continental Night Flight Duties

- 3.15.1. A flight duty rostered to terminate not later than 0100, which is delayed beyond 0130, will count as a night duty for the purpose of night duty limitations.
- 3.15.2. A normal scheduled flight reporting between 0200 and 0534 shall be operated in isolation. When such a rostered flight duty is not operated, the pilot may operate a two-sector flight, which terminates not later than the specified standby.

3.16. Standby Duty

- 3.16.1. The pilot shall be contactable at all times, when on standby.
- 3.16.2. The pilot shall be able to report for duty at the airport within two hours of being notified.

- 3.16.3. The pilot shall endeavour to report for duty as soon as possible when so requested.
- 3.16.4. Fifty percent of the expired portion of a standby duty shall be counted as flight duty time.
- 3.16.5. The pilot may be required to operate any flight for which the reporting time is within the period of the reserve duty.
- 3.16.6. The sum of the duty time for such a flight duty plus the expired portion of the standby counted at half time, shall not exceed the limitations of the maximum flight duty per 3.13.
- 3.16.7. The limitations under this paragraph may be increased by one hour for the purpose of operating an extended positioning duty. A pilot on standby, called for an extended positioning duty, shall operate that duty provided they have not operated an extended positioning duty in the preceding fourteen days.
- 3.16.8. The company shall make every effort to cover extended positioning duties with pilots who, if called, would not exceed the limitations of 2.11. Any extended positioning duty, so operated, shall count towards that pilots' commitment under 2.11. Should any pilots extended positioning duty quota be exceeded, the company shall write to IALPA in explanation and copy the pilot concerned.
- 3.16.9. A standby scheduled to commence before 22:00 hours, shall not cover intercontinental flights that depart between 00:00 and 07:59.
- 3.16.10. A rest period of not less than thirteen hours shall follow the completion of any standby duty.
- 3.16.11. A pilot on standby may contact crew control and request to be released.
- 3.16.12. A pilot on standby duty called for a flight duty which is subsequently delayed, shall operate such a delayed flight duty up to the limits of 3.10.
- 3.16.13. Any extended positioning duty so operated shall count towards the pilots monthly or annual quota.

3.17. Stick Time (seat time)

3.17.1. The limitations of 2.27 may be increased by up to one (1) hour to cover operating circumstances.

3.18. Contingency arrangements for rest area for augmented and or heavy crew

3.18.1. Aer Lingus shall only operate aircraft fitted with aircraft manufactured rest areas in the forward cabin for pilots when operating flights that require augmented or heavy crew, excepting EI-DAA, EI-ELA, EI-EDY, EI-DUZ, EI-EAV which are permitted to have class two rest facilities as per Expansion and Confirmation Agreement 2014. This article (3.21) does not alter the provisions agreed in Expansion and Confirmation Agreement 2014.

3.19. Continental Working Condition Through-the-Night

3.19.1. A flight duty rostered not encompassing 0300 which is delayed encompassing 0330 shall count as a through-the-night for the purpose of through-the-night limitations.

3.20. Operational Continuity

3.20.1. Where a rule interpretation difference is identified regarding a duty that commences within 96 hours of the issue being raised, crew control will attempt to resolve the issue within resources in a cost neutral manner. If this is not possible the pilot will operate the duty, without prejudice and the issue will be referred to the A330 Technical Working Group (TWG) or delegates for resolution. If the duty is confirmed to be outside current working conditions, then the pilot will be compensated by an OWC payment (0.19%) and such duties will not be rostered or amended again. Where the issue is raised with Crew Control within 7 days of commencement of the disputed duty the matter will be referred to the A330 TWG. Should the A330 TWG not be in position to meet in advance of the duty, where possible the duty will be changed provided a further limit on the operation does not result.

The limitations of this agreement may be waived when, by agreement with IALPA, a state of emergency is deemed to exist. New rostering criteria and their duration shall be determined by agreement between the Airline and IALPA. The limitations of this agreement may be waived in the case of search and rescue activities or to provide relief in cases of distress.
